

List of registered items for pilot PCR developments

Under the Japanese CFP pilot project, calculation rules shall be always based on PCR for the purpose of ensuring the credibility and comparability. Setting a specific calculation rule for each product category is useful to set proper rules for cut-off and allocation, as well as to determine the product-specific functional unit, system boundary, and database to be used. PCR also assists users to make informed comparisons among products within the same category. Through implementing PCR reviews, it is also possible to prevent arbitrary use of inadequate or inconsistent LCA calculation rules.

Furthermore, addressing particularities of each product category enables practitioners to work on CFP in efficient and effective manner, which would accelerate a larger expansion of CFP information.

The application for the PCR registration started on June 1st, and a number of companies from diverse sectors have been actively engaged until now.

The list below shows the registered items (products including services) and their predicted timing of PCR draft uploading.

(as of September, 2009)

classification	products (including services)	scheduled timing of PCR draft uploading
food & beverage	rice (polished rice)	2009.9
food & beverage	confectionery (crisp, rice biscuit, candy, chocolate)	2009.10
food & beverage	instant coffee	2009.11
food & beverage	pouch-packed rice	2009.9
food & beverage	instant noodle	2009.7
food & beverage	canola oil	2009.9
food & beverage	ham and sausage (including sauce and packaging)	2009.10
food & beverage	soft drink	2009.9
material	handmade Japanese paper	2009.10
material	paper and paper board	2009.11
containers & packaging	paper packaging and container	2009.10
containers & packaging	plastic packaging and container	2009.10
containers & packaging	glass container	2009.9
containers & packaging	metal container	2009.9
chemicals	organic liquid fertilizer	2009.10
chemicals	medicated handsoap (,made from recycled waste cooking oil)	2009.11

chemicals	washing powder	2009.8
printing	publication and commercial printing	2009.7
printing	pre-sensitized planographic printing plate	2009.7-8
furniture	office furniture	2009.12
clothing	uniform	2010.3
stationery	general stationery (e.g. stamp, glue, eraser, adhesive tape.)	2009.12
stationery	filing material	2009.12
stationery	plastic stationery	2009.12
stationery	metal stationery	2009.12
stationery	writing material	2009.12
stationery	notebook	2009.12
electronic devices	electronic thermometer, electronic manometer	2009.10
electronic devices	electric bulb, electric lighting	2009.8
electronic devices	small-sized secondary battery	2009.8
service	retail sales	2009.9
service	waste incineration service	2009.10
service	dissolution processing service of confidential documents	2009.9
service	management solution service for enterprises (e.g. HRM, accounting management, sales management)	2009.11
service	office operation solution service for enterprises (e.g. TV conference system)	2009.11
service	reuse service of lead batteries	2009.11
service	collection, delivery, disposal and recycling services of waste materials	2009.10
service	ICT hosting service	2009.12
others	dishware	2009.10
others	carpet made by recycled plastic bottle	2009.10
others	shipping pallet	2009.10
